Change Retail Price by Percent

PROGRAM NAME: CHGRETAL
MENU OPTION TITLE: Change Retail Price by Percent
MAIN MODULE: PART PRICE MAINTENANCE MENU #1
HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

This utility program will change the retail price of all items with a retail price. The calculation is done by a percentage and makes quick work of a monumental task if you have a large inventory with retail pricing.

PROGRAM OPERATION

ENTER PERCENTAGE TO USE: Type in the percentage of change you want for the retail price to change. You must type a "-" (minus sign) if you want the price to drop or omit the minus sign if you want the price change higher.

NOTE: YOU MUST ENTER THIS IN DECIMAL FORM, FOR EXAMPLE: IF YOU WANT TO DECREASE YOUR PRICES BY 5%, YOU WILL ENTER IN -.05. IF YOU WANT TO RESET THE PRICES TO THE ORIGINAL PRICE, YOU WILL ENTER IN .0526315.

This message is an example of how to run the program numbers. Three points it is making....

1. Use a minus sign to lower the price or omit to raise the price.

2. You must use decimal for of the percent or the program will not function properly

3. The same percent that drops the price is not the same percent that brings it back up to the price it was before it was dropped.

IS THIS THE CORRECT PERCENT?
