

Print Serial# Books

PROGRAM NAME: FEDPRINT

MENU OPTION TITLE: Print Serial# Books

MAIN MODULE: SERIAL# REPORTS

HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

This program generates a printed report of all entries in the entire serial number tracking system, in order of book, chronologically within each serial number. It includes: Manufacture, model, serial #, Model/Description, caliber, received information and sold/ship to information. This database is an independent file that is required for compliance with BATF regulations. The report pulls information from the database {FEDBOOK.DAT} only, and will need condensed print because of the detail.

PROGRAM OPERATION
