

Create/Edit Serial# Groups

PROGRAM NAME: GUNTYPES

MENU OPTION TITLE: Create/Edit Serial# Groups

MAIN MODULE: SERIAL# MAINTENANCE

HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

When you create a part, you can flag that part to automatically require serial numbers as you purchase and sell that part within the NBS system. If you do this, then this program allows you to create up to 35 serial number tracking files within the database "FEDBOOK".

PROGRAM OPERATION

SE# BK TYPE: This is the actual single digit code of the book. Typically, you will use an alphabetical code, which will be referred to throughout the serial number tracking system.

DESCRIPTION: A 20-character description of the book

MANUFACTURER: A 10-character field for the manufacture's name. It may be yours and it may be someone else's. BATF assigns this name.

MODEL: 6 characters.

USER: 6 characters.

RECEIVED FROM: The proper name of the business.

STREET:

CITY:

STATE:

BOOK PREFIX: BATF allows a 2-character prefix on a serial number.

BOOK SUFFIX: BATF allows a 1-character suffix on a serial number.

PRESS RETURN TO CONTINUE: This will appear after you have returned past the previous field.

Note: You can use the <IFF> functions to move around this screen. Be careful using <F6>, which will delete the fedbook in its entirety.
