

## **Recalculate Assigned Noprint**

**PROGRAM NAME:** INASSIGN

**MENU OPTION TITLE:** Recalculate Assigned Noprint

**MAIN MODULE:** PARTS MAINTENANCE

**HELP KEY ACTIVE:** NO

### **PROGRAM OVERVIEW**

By part number, this program will search all unshipped orders to recalculate the quantities of inventory necessary to fill these orders. Then it will adjust the value of assigned to reflect the recalculated amount. This will help you determine if you need to reorder or step up production to satisfy the unshipped demand.

**NOTE:** This program does not have a print option available. If you need a printout of the parts list calculated, use the program <Recalculate Assigned Print>.

### **PROGRAM OPERATION**

**Proceed with recalculating assigned<Y/N>?**

**Enter PART # to calculate, RETURN for all:** Type a valid part number to calculate one part number or press <ENTER> to calculate for all parts.

**PRESS RETURN TO BEGIN, ESC TO ABORT:**

**Calculating assigned for part # ----->:** This screen is showing the part or parts range, selected, as each part number is being checked for recalculation.
