Enter/Edit STD C.O.M.

PROGRAM NAME: INENTBOM
MENU OPTION TITLE: Enter/Edit STD B.O.M.
MAIN MODULE: W.O. B.O.M. MAINT.
HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program allows you to create and edit bills of materials for your products. Before you create the bill of materials, all components and subcomponents should be entered to ensure accuracy of the BOMs. If the bill of materials that you are creating is similar to another bill already in the system, run {INCPYBOM} to copy the bill, then run this program to edit it to your needs.

PROGRAM OPERATION

MASTER PART NUMBER:

If this is a new B.O.M., the following will appear, "**DO YOU WANT TO CREATE THIS B.O.M.? (Y/N)**. After you say <Y>, the cursor will move to line 1.

SUB PART NUMBER:
QUANTITY:
R/F: Raw or Finished. This field will automatically be filled in according to the sub part number's part description.
RPL?: (What goes here?)

Once you have finished adding sub part numbers, enter on a blank part number line. NOTE: Do not create sub-BOMs at this time. Those should be done under separate bills of materials for the sub part number that needs a bill of material attached to it.

(A)dd, (D)elete, (E)dit, (S)eemore, (G)oto, or (Q)uit? <Q>

Accept this cost as the new standard cost?
