

Margin Analysis by Group

PROGRAM NAME: MARGANA3

MENU OPTION TITLE: Margin Analysis by Group

MAIN MODULE: SALES MARGIN REPORTS

HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This report displays two ways, Detail and Summary. The detail shows, per Group, all customers who had orders for a Group of Part Numbers. The Gross Margin Percentage is calculated from Actual Cost.

The Summary shows, by Groups with Part Numbers, totals only in the above mentioned amount fields.

If you use the Grouping Codes, this makes a third way to define how you want to see your report. You have two other options, which are by Customer and by Part Number. We wrote these to give you flexibility to help generate reports in as many ways as might be needed.

PROGRAM OPERATION

EARLIEST SHIP DATE OR BLANK FOR FIRST: This defines the beginning of your report. Type the beginning date for your report or blank for all.

LATEST SHIP DATE OR BLANK FOR LAST: This entry will define the last date for your report. Type the date you need or blank for all.

ENTER REPORT GROUP OR BLANK FOR ALL: < >

ENTER PART NUMBER OR BLANK FOR ALL:

PRINT (D)etail OR (S)ummary REPORT:
