Machine Category File Maint.

PROGRAM NAME: WOMACGUT
MENU OPTION TITLE: Machine Category File Maint.
MAIN MODULE: WORK ORDERS
HELP KEY ACTIVE: YES

PROGRAM OVERVIEW

This program is used to setup and maintain categories of machines. This allows for the grouping of similar machines on the shop floor into a single category. For example, all Excello vertical mills can be grouped together under machine category "100".

If you use subcontractors, then you may want to set up a code for subcontractors for use in the routing master file.

The routing master will refer to this data file when creating a routing master.

The program will not allow you to delete an active entry and will ask you to confirm to delete if it is not active. You can use the <IFF> functions.

PROGRAM OPERATION

MACHINE CATEGORY: Enter a 3 digit code that will uniquely identify a machine category. If you need to make changes to a category that has previously been entered, simply enter the category code and press <ENTER>. The MACHINE NAME will be automatically displayed and you can change it.

MACHINE NAME: Enter a brief description of the machine category grouping.

PRESS ENTER TO CONTINUE
