

Copy Routing Masters

PROGRAM NAME: WOTMPCPY
MENU OPTION TITLE: Copy Routing Masters
MAIN MODULE: WORK ORDERS
HELP KEY ACTIVE: NO

PROGRAM OVERVIEW

This screen allows you to copy an existing routing master template from one part number for a different part number. This can be extremely useful when a new product is to be made that has similar operations as an existing product.

PROGRAM OPERATION

ENTER THE PART NUMBER TO COPY FROM: Enter the part number for the routing master that you want to copy from. The part number entered must be a valid inventory item and it must have a routing master. If an invalid part number is entered, the error message "**PLEASE ENTER A VALID RECORD ID**" will be displayed. If the part number entered has no routing master, you will get the message "**NO ROUTING MASTER EXISTS FOR THAT PART**". If a valid part number is entered, the part description will be displayed.

ENTER THE PART NUMBER TO COPY TO: Next, enter the part number that you want to create a new routing master for. The part number entered must be a valid inventory item. If an invalid part number is entered, the error message "**PLEASE ENTER A VALID RECORD ID**" will be displayed. The part must also not possess a routing master or the program will prompt you "**A ROUTING MASTER FOR THAT PART ALREADY EXISTS**". If a valid part number is entered, the part description will be displayed.

Is this information correct (Y/N)?

O.K. TO BEGIN DUPLICATING ROUTING MASTER (Y/N)? This appears only if the part you are copying to already has a routing master.

Do you want to copy another routing master (Y/N) ?
